Material	Acrylonitrile Butadiène Styrène (ABS) (outer shells)
Main colour	Black
Size	Universal (adjustable neckband)
Battery type	Li-PO
Capacity battery	190 mAh
Rated voltage	3.7 V
Certifications	CE
Certifications	FCC
Certifications	IC
Certifications	WEEE

A versatile wireless industrial headset to optimise your voice picking activities

Rugged, lightweight, modular and with excellent audio quality, this Bluetooth® SILVERBACK® **Mono** headset will provide your picking operators with full shift comfort and stability:

- Ruggedness at all times: withstands the most demanding environments and harsh operating conditions (IP67, Mil-STD-810, use from -30° to +50° C)
- A featherweight: 84 grams ("behind the neck" version)
- High quality sound: high-performance noise-cancelling microphone (97.5% active noise cancellation), enhanced speaker output 125 dB, to either right or left ear (swivel microphone boom)
- Versatile and ergonomic: 4 versions available (mono, stereo, behind the neck, for safety helmet)
- Modular: interchangeable parts easily and quickly (you can replace the micro and speaker foams for multi-user use, replace the headband yourself in case of breakage, or also change the headset model without having to buy a new one)
- Universal: works with any device with standard Bluetooth® (mobile terminals, PDAs, industrial tablets and smartphones, etc.)
- High autonomy: 16 Hour Talk time with a battery before swap out is needed
- Flexibility of use: hot swap removable battery (to allow you to continue working without losing the BT connection with the paired mobile device)
- Simple and fast Bluetooth® pairing: via barcode reading ("Scan-to-Pair" with devices supporting BT Mac Address Scanning), NFC ("Tap-to-Pair" with devices supporting an NFC Connection), or manually

Each headset is delivered with its rechargeable battery (SB-BTHS1), and already installed: 1 microphone foam (SK-BTHS1-MF) and 1 standard speaker foam (SK-BTHS1-SF).

The charger (2 or 10 slots) and the other available accessories are to be ordered separately.

15 months warranty

(incompatible with VOCOLLECT® talkmans due to the manufacturer's specific and closed BT protocol)

Especially designed for voice picking operations, our headsets are tested and proven daily in the most demanding industrial and warehouse environments worldwide
